

**Datacentrix
Network Services**

**Network Services
Architecture**

Network Design

Network analysis

Analysis of 'future network' integration potential

New technology feasibility

**Network Services
Integrate**

Network Integration

Design review

Blueprint/plan for delivering functional network elements

Node configuration and deploy physical connections

Configuration layer 2, 3 logical connections

Documentation

**Network Services
Consolidate/Migrate**

Network Consolidation and Migration

Identify locations/sites

Systems and procurement

Configuration(s)

Installation methodology and tune-up

Deployment planning and project management

**Network Services
Optimise**

Wide Area Data Services (WDS)

Application Acceleration

TCP behaviour optimisation

Latency reduction

Reduction of duplicate data across the network

Optimised specific application protocol behaviour
