BIOGRAPHY

Gys Malan
Solutions Manager at Huawei

Gys is a data and communications solutions architect who is responsible for developing and growing the Huawei's market position within the industrial vertical. His career spans over 20 years within the ICT sector, where he has garnered a multitude of technical and business skills covering specialist knowledge of servers, storage, virtualisation, structured cabling, WLAN, CCTV, ICT services and data centre facilities.

As an advocate of good and best practices, Gys's passion lies in the delivery of best-of-bread ICT services and solutions. He creatively designs, implements and manages enterprise solutions for large scale organisations.
