

# TERACO DATA ENVIRONMENTS

## Company Profile

Teraco provides carrier and cloud neutral colocation data centres, and with over 18 000 cross-connects, is Africa's most interconnected data centre hub. As the first provider of highly resilient, vendor-neutral data environments in sub-Saharan Africa, Teraco brings global content closer to the digital edge.

With its world-class data centre infrastructure and network dense ecosystems, Teraco forms a vital part of the African Internet's backbone and is an essential part of the modern enterprise's digital transformation strategy.

Its ever expanding ecosystems move Teraco beyond colocation and firmly establish it as an open marketplace for digital growth and innovation. Discovering new business partners, making strategic interconnection choices, on-ramping to your choice of cloud, and reaching new markets globally – Teraco provides a highly secure, flexible and resilient home for digital organisations the world over.

Purpose-built and operated to global best practice by an expert organisation with an absolute focus on data centre technology and infrastructure, Teraco offers all its clients secure, cost-effective, sustainable, scalable and resilient data centre services through its Johannesburg, Durban and Cape Town facilities..

## OUR BACKGROUND

Founded in 2008, Teraco Data Environments has brought international best practice in vendor neutral data centre management to South Africa to give businesses a technically superior, physically safer and lower cost environment for their information systems.

As the local telecommunications market began to deregulate, Teraco's founders recognised an opportunity for a truly vendor neutral data centre offering in South Africa. The possibility of providing a service that was not tied to any Carrier or ISP became not only technically feasible and economically viable, but increasingly desirable to South African enterprises which needed unrestricted choice in how they interconnected their facilities and connected to the Internet. Teraco manage colocation data centres in Cape Town , Durban and Johannesburg.

**Teraco is backed by leading international investors including Berkshire Partners and Permira.**

**Teraco is a Level 2 BBBEE contributor.**

## NAPAFRICA FACTS

6 Regional Data Centres

6 Diverse Internet eXchange Points

>550 Clients

## TERACO SOLUTIONS

- ✓ Colocation: cabinet, cage or suite
- ✓ Interconnection
- ✓ Peering at NAPAfrica
- ✓ Low Latency Network
- ✓ Connectivity
- ✓ Business Continuity
- ✓ Support and Technical
- ✓ Monitoring

## HOW WE HELP OUR CLIENTS

Teraco, Africa's most interconnected data centre, is enabling the connected enterprise. From discovering new business partners, to making strategic interconnection choices, or on-ramping to your choice of cloud, and reaching new markets globally - Teraco provides a highly secure, flexible and resilient home for the digital enterprise.

## CLOUD & IT SERVICE PROVIDERS

To reach your revenue goals, you must explore new markets for your IT services and improve overall performance. A growing footprint, network density and high performance are hallmarks of Teraco.

## ENTERPRISE & FINANCIAL

Remaining competitive today means having complete transparency and being able to control infrastructure costs without sacrificing flexibility or performance.

## CONTENT & DIGITAL MEDIA

NAPAfrica Internet Exchange Point (IXP) is where content and users connect. Locate your infrastructure closer to end users while gaining immediate access to an African distribution hub.

## CARRIERS & NETWORKS

Teraco's regional footprint of vendor neutral data centres allows you to deploy infrastructure once and then interconnect quickly and efficiently to multiple clients.

---

To find out more about Teraco's data centre facilities and how to position your critical infrastructure where the edge and digital ecosystems are evolving, simply contact a Teraco sales executive at [sales@teraco.co.za](mailto:sales@teraco.co.za).
