

This course is ideal for...

IT, compliance officers, legal staff, records management personnel, archivists, consultants, and the information professionals who are planning to establish or improve your information governance program. You'll acquire the necessary skills to:

- Design a pragmatic framework for managing information assets
- Improve how information is captured, shared, accessed, stored, and disposed of
- Reduce storage and legal costs
- Save time and money through greater interoperability and standardized components
- Ensure legal and regulatory compliance

Information Governance

Learn a systematic approach to improve access to information, reduce costs, and meet legal/regulatory requirements.

Course Benefits and Objectives

The volume, variety, and velocity of organizational information is changing the game for governance and compliance. Applying a paper paradigm of policies and processes no longer works -- and it certainly doesn't scale. Governance functions must now be automated, and focus as much on defensible disposition as on retention; as much on data extraction as data archiving.

AIIM's Information Governance course is founded on these best practices to provide you with a systematic approach for managing information assets and ensuring regulatory compliance. The information is applicable across all industries and is independent of any particular technology or vendor solution.

Your Learning Options

The Information Governance course is comprised of multiple topics leading to the Specialist in Information Governance designation that is earned upon successful passing of the exam. Once purchased, the course topics, supporting materials, and exam are accessible online and on demand from AIIM's training portal for 6 months.

Feedback:

"AIIM's courses not only impact businesses, but can help graduates become more efficient and effective in information management at home. The content in the various modules is very versatile and practical in its potential applicability. Even company and department heads should educate yourselves to properly supervise those with whom you may contract to do a job in this field. It is one step you can take to protect your investment."
