# SCALABLE SANITISATION TUNNEL SOLUTION

**Convenient, effective sanitisation  
for walk-through traffic**

Effective sanitisation is the first line of defence against spreading disease. The fully customisable sanitisation tunnel solution from Datacentrix provides an innovative, high-tech response to the health and safety regulations by government to mitigate and manage the COVID-19 outbreak. With infrared detection, programmable spray intervals and Wi-Fi capabilities, the free-standing solution helps reduce the health risks associated with spreading COVID-19.

Brandable, high-density polyurethane panels

Inverted box rib roof panel

Entry and exist sensors

Adjustable levelling system

Nozzle sanitising system

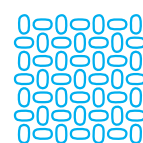

LED lighting

Two 20 litre drainage points

Internal, entry and exit handrails

Non-slip checkered plate flooring

## Features

The modular solution is fully customisable and can be used in a single or multi-stack set up and is appropriate for any environment with high walk-through rates such as mines, malls, factories, office parks, educational institutions, correctional services facilities and many more.

The water-based formula is non-staining and safe on the skin, eyes, nose and mouth, and harmless if inhaled.

- Full turnkey operation
- Wheel-chair friendly
- Non-corrosive and suitable for outdoor conditions
- Dust and water-resistant connections and control panel
- Tamper-proof with fully concealed plumbing and electrical systems
- Standard factory warranties apply

## Health and safety enabled by technology

The tunnel sanitisation solution integrates with other Datacentrix competencies into a comprehensive solution, equipping businesses with the right information to make informed decisions about the health and safety of individuals entering their premises.

- Contactless, artificial intelligence (AI) enabled fever screening solutions at scale
  - Thermographic and infrared camera technologies with thermal and optical capabilities
  - Facial recognition and metal detection capabilities
  - Handheld devices
  - Static bullet or turret cameras
  - Smart phone with thermal imaging
- Time and attendance and access control systems integration
- Secure, reliable connectivity to bandwidth-intensive applications, cloud services and unified communications
- Software-defined wide area networking
- Wireless or WiFi IP surveillance and CCTV for public areas
- Informed data management, protection and optimisation
- Converged infrastructure solutions for the secure storage of data
- Enterprise-wide threat protection and scalable security services

## Rental and finance options

Clients can select from rental and finance options according to their needs, including end-to-end services that are governed by service level agreements.

## Repurposing with a purpose

Businesses can convert the tunnel into a fully functional, portable toilet at a minimal cost for use in underdeveloped communities and schools as part of their corporate social responsibility programmes in the future.

## Contact

## About Datacentrix

Datacentrix enables digitalisation success. The company's specialist teams leverage the combined power of information and communications technologies to advise, connect, transform, improve and future-proof business, supporting clients throughout their digital journey.

Datacentrix offers expert advisory services and deep technical expertise across a mature offering, providing proven execution capability that is endorsed by the world's foremost technology partners. With a strong African footprint, the company is recognised for its agility, in-depth industry knowledge, ethical practices and strong overall performance.

### Empowerment and compliance

Datacentrix is a Level One (AAA) B-BBEE Contributor, with 135 percent procurement recognition.

The company and its subsidiaries hold ISO 27001 – Information Security Management System (ISMS); ISO 9001:2015 – Quality Management System; ISO 14001:2015 – Environmental Management System; and OHSAS 18001:2007 – Occupational Health and Safety Management System certifications.

### Disclaimer:

The use of this product is to assist with the fight against COVID-19 by reducing the number of germs on an individual. It is still important to note that disinfection tunnels are not meant to be one hundred percent effective and are only supplementary to existing measures like washing hands, wearing masks and maintaining physical distance.
